

Send a letter immediately as the 18th of October is  
the last day for proposal against transporting  
nuclear waste in our state!

With all the possibilities of terrorist attack within the United States, there should not be dangerous materials transported across state lines. The threat of terrorists using our nuclear waste against us is simply too great and places innocent people at risk. With the terrorists creating so much carnage so easily in New York, how dare you put any other state in harms way! Even if America finds and destroys the terrorists leadership, we will still need to be vigilant in our protection of Americans on our own soil!

RECEIVED

OCT 23 2001

*you will receive quite a few letters like  
the above. I required a signature <sup>on all letters sent</sup> on these papers  
but I didn't tell them they had to give you  
their address. Everyone of these letters have been  
sent with knowledge of what our feelings  
are. I walked door to door on these papers.*
